## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/17/2009 has been entered. Claims 1-4, 7-8 are pending and have been considered on the merits. All amendments and arguments have been considered.

The rejections of record under 35 USC 112, first and second paragraphs, are hereby withdrawn in view of the arguments presented and amendments to the claims.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 7 including dependent claims 2-4, 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, the amendment to claims 1 and 7 which claim "...at least 1x10<sup>6</sup>

and at least  $3 \times 10^6$ ..." introduces new matter, which is not described in the specification as originally filed. Applicant discloses on page 9, 4<sup>th</sup> paragraph, that by the claimed method 3 to  $5 \times 10^6$  chondrocytes can be obtained at the first generation of subculture from a human auricular cartilage tissue piece ( $1 \text{ cm}^2$ ) and further disclose on page 13 Subculture section, that from the primary culture  $1 \times 10^6$  cells were seeded in a flask to obtain a subculture. While applicant has support for  $1 \times 10^6$  and 3 to  $5 \times 10^6$  cells there is not support for "at least" which does not clearly define the upper limit of cells obtained. Applicant does not have support for an infinite amount of cells obtained. Therefore, "...at least  $1 \times 10^6$  and at least  $3 \times 10^6$ ..." in claims 1 and 7 changes the scope of the claims and applicants invention for which no support is provided. **This is a new matter rejection.**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

### ***Allowable Subject Matter***

Claims 2-4,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
